# ABOUT US

We are a company specialized in inspection services for the metal-mechanic industry, committed to ensuring safety, efficiency, and durability in all our services.

We rely on cutting-edge technology, highly qualified personnel, and extensive experience in the sector to offer comprehensive solutions to our clients, guaranteeing the reliability and efficiency of our operations.

At **VICOM INSPECCIÓN** we provide trustworthy, transparent, and top-tier services.

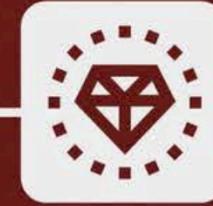

# MISSION

Guarantee the integrity and efficiency of equipment and tools through specialized inspection services, advanced technology, highly skilled personnel, and a steadfast commitment to safety, precision, and reliability.

# VISION

Be the leading company in non-destructive testing within the sector, recognized for operational excellence, technological innovation, and our crucial role in risk prevention and the protection of strategic industrial assets.

# VALUES

- Integrity
- Competitiveness
- Safety
- Innovation
- Responsibility

We provide tubular inspection services using cutting-edge equipment based on electromagnetic inspection (EMI) technology, which enables the precise detection of internal and external defects such as corrosion, cracks, or wall thickness loss, ensuring drill pipe integrity.

Our EMI system delivers reliable and detailed results, optimizing evaluation times and reducing operational costs for our clients.

# OUR SERVICES

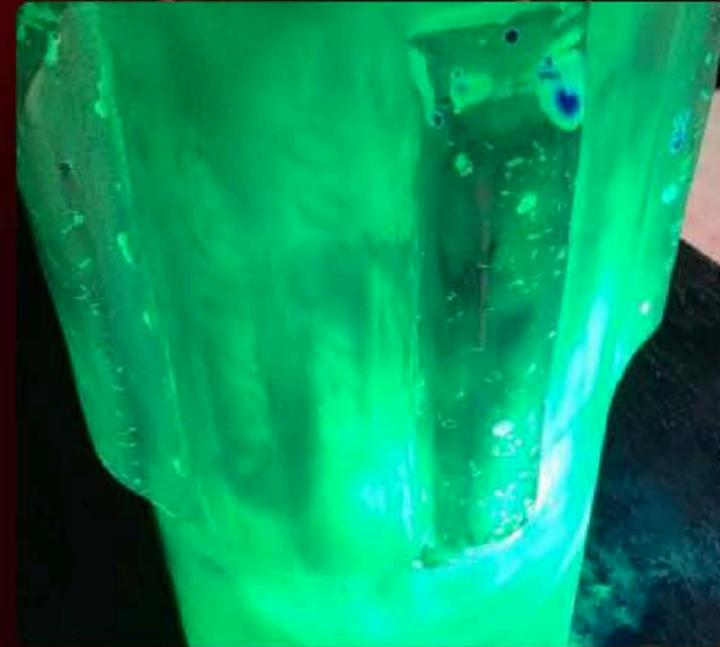

## VISUAL TESTING (VT)

We accurately assess the external condition of drill pipe and components.

## LIQUID PENETRANT TESTING (PT)

We detect cracks and surface defects not visible to the first glance.

# OUR SERVICES

## MAGNETIC PARTICLE TESTING (MT)

We identify discontinuities in ferromagnetic materials.

## ULTRASONIC INSPECTION AND WALL THICKNESS (UT)

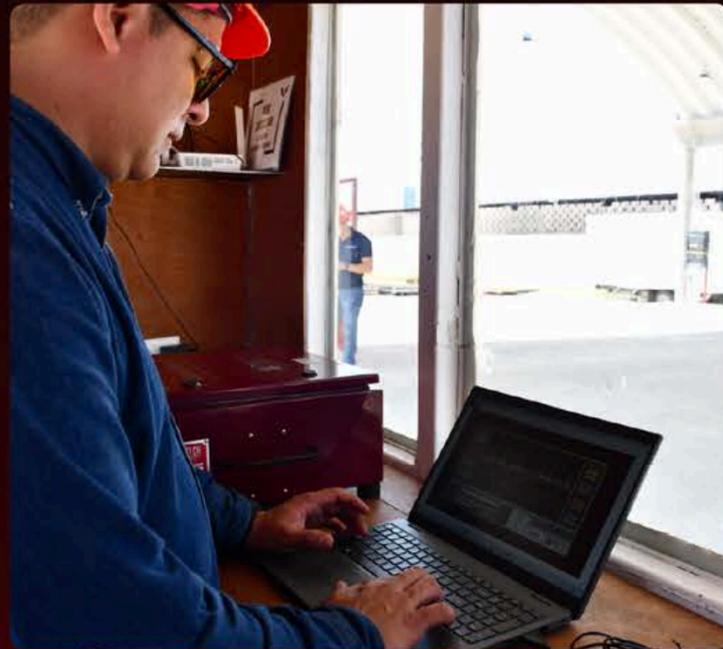

We measure thickness and detect internal defects using ultrasonic technology.

# OUR SERVICES

## ELECTROMAGNETIC INSPECTION (EMI)

We locate internal and external defects in drill pipe with high precision.

## BOROSCOPE (INTERNAL VISUAL INSPECTION)

We perform detailed inspections in hard-to-reach areas

## HARDNESS TESTER

We verify the grade of the steel to ensure it is appropriate for the manufacturing of the tools.

# SCOPE OF SERVICES

## **BHA DRILLING TOOLS**

- Magnetic and antimagnetic drill collars
- Stabilizers and double near bit
- Mud Motors & Jars
- X-over & VCP

## **DRILL PIPE AND HEAVY WEIGHT**

- Pipe inspection under API and DS-1 criteria

## **SPECIAL TOOLS**

- Mills
- Reamers
- Fishing tools
- Safety joints
- Junk baskets

## **FLOOR TOOLS**

- Top Drive and components, Welding in critical mast points
- Mud tanks, Traveling block, crown block, pin

## **LIFTING AND STORAGE EQUIPMENT**

- Baskets, racks
- Welding on pressure vessels
- Flanges

# CERTIFICATIONS

At **VICOM INSPECCIÓN**, we provide reliable, transparent, and high-quality services.

Our personnel are certified under the SNT-TC-1A 2024 Edition scheme, performing inspections in accordance with DS-1, API, and AWS standards.
